

Letter to Western Producer.

Sir:

Have just been re-reading some of E. P. Waldron's columns published in the Western Producer of 1968.

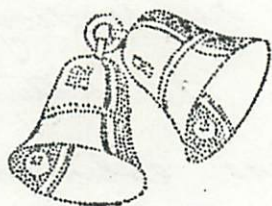

I for one miss these columns since "Pat" retired.

It is my belief that he put his finger on much of the cause of all our unrest in society, more than any other contributor to the pages of Western Producer. He pointed out to many of us who cared to take the time to read just in what direction we were heading. It is 1971 now and it seems to me we are at a point predicted not only in 1968 but for many years before that.

One wonders what our current system of education has produced in Canada in the way of public integrity and dedicated public service.

Our news media is saturated with articles dealing on financial help forthcoming to the man on the land. To the housing industries, to upgrading unemployed so that they can fill jobs which will have vanished before their ^{course} ~~month~~ if upgrading is completed.

What sort of a society have we brought about that can look with a unanimity upon

July 2, 1968.

Dear Friends:

This letter to announce the marriage between Heather, daughter of Mr. & Mrs. N.L. Turnbull of Binscarth, Manitoba, and Gordon, son of Mr. & Mrs. G.N. Thurston of Regina, Saskatchewan, which took place on Saturday, June 8th., 1968, in Regina.

We had planned our wedding for August, 1968, and were including you to attend the event, but decided to move the date of the occasion to the above and have a small, simple wedding. We regret that this day, so meaningful to us, could not have been shared with all our friends. Thus our desire to inform you of our recent marriage.

Hoping that we will meet you again, or for the first time, as the case may be, in the days ahead.

Sincerely,

Gord and Heather Thurston

to 20,000

an unemployed portion comprising 8% of its members who have nothing to look forward to other than possible short term employment between each ^{period} ~~year~~ of upgrading.

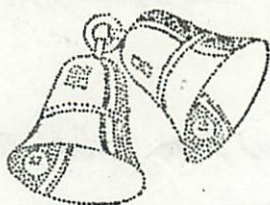

Farmers know, or should know, that their choice of agriculture as a means of livelihood is not a short-term venture. At least twenty years is needed in the care and nurture of its land to build a business basis that will stand the shocks of natural adversity and government ~~interference~~ intervention. So far scientists have been of enormous help in providing man with grains, grasses & fruits that mature more quickly and withstand the scourges of disease. To date they have managed to do little to change the natural seasons or the gestation periods for all animal life including man.

Yours truly, [Signature]
